Date and Time: March 8, 1971, 18.00

Chairman: Alecto

Vice-Chairman: Astor

Minutes: See attachment 1

Reports:

1. First on the agenda: select the upcoming Star Students for fall term of 1971.
2. Everyone agreed on Jack Howard, and after some heated discussions, Henry Wittinger due to his interesting 'super-power,' rather than any other skill. It's important that the team he ends up in will continue to form his mind, so it develops more into true FR-think-tank than what he displays now.
3. What to do with Kazimir and Team K. Suggestions went from forced lobotomy to assassination. We postponed the minute for the time being, since we couldn't agree upon which direction to go. Homework for everyone is to think about a good solution that won't hurt the Team too much, while still being able to shut the fuck up about the GFS.
4. Adjournment.
